SCHROEDAHL Desuperheater

- High quality steam cooling device for precise temperature control -

Through constant optimization of our production processes, we have succeeded in offering a defined high quality standard desuperheater including a pneumatic actuator with 8 weeks delivery time.

Features

- Various flow characteristics
- Large rangeability of water
- Large delta p water/steam up to 100 bar
- No additional control valve required
- Tight shut off in closed position- Dripping not possible.
- Body in various forged material
- High Kv/Cv values
- Large cooling capacity
- Internals not welded. No vibrations / thermal fatigue damages
- High reliability due to easy components with wide service life
- Easy maintenance

Conditions for 8 week delivery

- Material: 1.5415, 1.7383 / F22
- Pressure range: up to PN 160 // class900
- Flange range: acc. to EN (B1) / ANSI (RF) standards
- Pneumatic actuator: high quality diaphragm actuator
- Painting and inspection: high quality factory standard
