Dismantling Joint

Rigid Dismantling Joints - Type F1

Flange Drilling as per ISO 7005-1(EN 1092- 1, DIN 2501) Standard
 Pressure: PN10, PN16, PN25 & PN40

Features:

By using these joints, valves could easily be installed, removed/dismantled from the pipeline. By turning the bolts the length of the dismantling Joints can be reduced allowing enough space for removing the valve and sealing washers from the pipeline. For installing the valves and sealing washers, the length of dismantling joints can be adjusted by the adjusting bolts and therefore fastening the valve tightly to the pipe flanges.

Coating:

All parts are coated with electrostatic epoxy powder with minimum 250 micron suitable for potable water.

Material Specification:

Rigid Dismantling Joints - Type F2

Flange Drilling as per ISO 7005-1(EN 1092 – 1, DIN 2501) Standard
 Pressure: PN10, PN16, PN25 & PN40

Features:

By using these joints, valves could easily be installed, removed/dismantled from the pipeline. By turning the bolts the length of the dismantling Joints can be reduced allowing enough space for removing the valve and sealing washers from the pipeline. For installing the valves and sealing washers, the length of dismantling joints can be adjusted by the adjusting bolts and therefore fastening the valve tightly to the pipe flanges.

Preference: Quick and Easy installation to Type F1

Coating:

All parts are coated with electrostatic epoxy powder with minimum 250 micron suitable for potable water.

Material Specification:

Flangs Socket	Steel/Ductile Iron
Flangs Spigot	Steel/Ductile Iron
Middle Ring	Steel/Ductile Iron
Seal	EPDM or NBR

Rigid Dismantling Joints - Type F3

Flange Drilling as per ISO 7005-1(EN 1092 – 1, DIN 2501) Standard

Pressure: PN10, PN16, PN25 & PN40

Features:

Non Rigid dismantling joints in addition to pedestrian and assembly of valves can neutralize line's angle up to $^{\circ} 4\pm$, they have also ability to neutralize the vibrations, these parts due to special design and has the ability to withstand high pressures.

Coating:

All parts are coated with electrostatic epoxy powder with minimum 250 micron suitable for potable water.

Material Specification:

Flangs Socket	Steel/Ductile Iron
Flangs Spigot	Steel/Ductile Iron
Middle Ring	Steel/Ductile Iron
Seal	EPDM or NBR
